

Environmental Capability Statement

Caring for the environment and creating safer workplaces

Envirocare's longstanding commitment to stack emissions monitoring has seen our extensive scope of accreditation continually grow for many years. Now, almost complete, Envirocare are able to offer UKAS and MCERTS accreditation for every Environment Agency 'Standard Reference Method' and many more besides.

Extensive MCERTS Scope

Determinand	Method
Total Particulate Matter	BS EN 13284:Part 1
Total Particulate Matter	BS ISO 9096
Water Vapour	BS EN 14790
Oxides of Nitrogen	BS EN 14792
Carbon Monoxide	BS EN 15058
Sulphur Dioxide	Environment Agency TGN M21
Sulphur Dioxide	BS EN 14791
Oxygen	BS EN 14789
Total VOC	BS EN 13526
Total VOC	BS EN 12619
Speciated VOCs	BS EN 13649
Ammonia	BS EN 14791
Amines and Amides	BS EN 13649
Formaldehyde	BS EN 13649
Halides / halogens	US EPA Method 26 / 26A
Hydrogen Sulphide	US EPA 11
Dioxins	BS EN 1948: Part 1
Furans	BS EN 1948: Part 1
Polychlorinated biphenyls	BS EN 1948: Part 1
Polyaromatic Hydrocarbons	BS ISO 11338: Part 1
Hydrogen Chloride	BS EN 1911: Part 1
Hydrogen Fluoride	BS ISO 15713
Heavy Metals	BS EN 14385
Mercury	BS EN 13211
Velocity/Flow/Temperature	BS EN 13284: Part 1
QAL 2 & AST	BS EN 14181

Extensive ISO Scope

Determinand	Method
Water Vapour	USEPA Method 4
Formaldehyde	MDHS 19
Diisocyanates	MDHS 25/3
Carbon Monoxide	ISO 12039
Oxides of Nitrogen	ISO 10849
Sulphur Dioxide	BS 6069 part 4.4
Oxygen	BS ISO 12039
Carbon Dioxide	ISO 12039
Ammonia	US EPA Method 26 / 26A

'Your consultants showed a very professional approach to the work, as noted by several of our operators.'
Paul Dover, Northumbrian Water.

'Just a quick note to let you know, I am very impressed with the stack monitoring service I have received from Envirocare. I am glad to say that I have found your services to be of excellent value.'
Andrew Lupton, Econ Engineering

MCERTS Accreditation

Caring for the environment and creating safer workplaces

MCERTS is the Environment Agency's monitoring certification scheme. The scheme provides a framework for operators to meet strict quality requirements imposed by the Environment Agency. By promoting the use of accredited personnel and monitoring equipment, testing is undertaken to the highest standard and can be traced back to meet the requirements of a quality system.

There are many benefits associated with having monitoring undertaken to the MCERTS standard. The most obvious being the reporting of accurate and reliable data.

MCERTS can also be used to save you money; MCERTS monitoring increases an operators Operator Monitoring Assessment (OMA) score which may in turn reduce the annual cost that operator pays the regulator to operate their process.

Envirocare MCERTS Capabilities

Determinand	Method
Total Particulate Matter	BS EN 13284:Part 1

Velocity/Flow/Temperature	BS EN 13284: Part 1
QAL 2 & AST	BS EN 14181

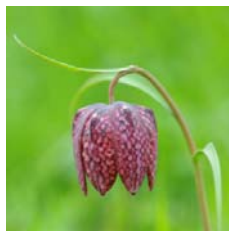

The Envirocare monitoring work at AGM has been completed by professionals in a timely, efficient, well organised and reliable manner. An excellent standard of documentation is provided, with precise data included in the report.

Duncan Hardiman, HSE & Facilities, AGM Batteries Ltd

Stack Emissions Monitoring

Caring for the environment and creating safer workplaces

Stack emissions monitoring can be undertaken for a number of different reasons. Most commonly it is used to demonstrate compliance with a permit issued in accordance with the Environmental Protection Act (1990) and Environmental Permitting Regulations (2010). These regulations often impart obligations upon the operator to have process emissions quantified.

Envirocare has twenty years worth of stack emissions monitoring experience. During this time we have worked in a wide range of industrial sectors. The extensive knowledge and experience that has been accumulated along the way ensures that Envirocare can offer your business the best possible service available. Our ever expanding scope of accreditation guarantees that monitoring is strictly undertaken in accordance with the highest standards.

We offer:

- An MCERTS and UKAS accredited stack emissions monitoring service to meet the compliance obligations of your permit.
- Compliance monitoring for EPR processes.
- Process efficiency trials and abatement plant optimization.
- Baseline measurements for internal Environmental Management Systems and ISO14001.
- Quality Assurance monitoring of Automated Measurement Systems to BS EN 14181.
- Ambient Air Monitoring.
- Fully trained MCERTS accredited personnel and equipment
- Comprehensive reporting of results generated, methods employed and conclusions drawn.
- A holistic approach to the stack emissions monitoring process, including project management from the initial contact stage.

Andrew Lupton, Econ Engineering

Caring for the environment and creating safer workplaces

Envirocare offer a range of consultancy options that could help you to quantify and reduce your impact upon the environment. In many instances, addressing environmental issues may have the beneficial effect of cost savings to your business. Our consultants are happy to help you with the specifics of your requirements as we understand that every business is different.

Environmental Review

Alongside our accredited air emissions monitoring work and occupational hygiene services, we can offer environmental improvement assistance to aid your business meet its green obligations. The environmental review will give you an idea of how your company is performing environmentally. It outlines areas of improvement and areas where your company is doing well. It is recommended that this is carried out once per year.

Environmental Policy

Does your company need a method of explaining to clients and customers what you do about your environmental impact and what you wish to achieve. Many clients expect companies they employ to demonstrate some form of environmental awareness and show that they are considering the environment with their working practices.

Carbon Footprint

Demonstrate to your clients that you are tackling your CO2 emissions seriously through energy reductions and behavioral changes. Are lights and other electrical items being left on unnecessarily? Are the wrong vehicles being used? Could you reduce the number of car journeys?

Waste Auditing

With landfill tax increasing every year and set to reach £80 per tonne by April 2014, it is more important than ever to look at waste reduction, recycling and waste segregation. We can look at your current usage of raw materials and the production of waste types in your company.

Energy Efficiency

In order to see if you are wasting money and polluting the environment by being inefficient with energy we can assist you with energy auditing, help you to create an action plan and encourage others in the company to take part.

Let us come and assess your business and identify areas where you can save and make noticeable achievements.
